

THEM AND US

In the early morning freeze, we're in a line
They're going past, in the warm and looking fine
We're off to do the dirty work, the most important part
They're off to do the easy jobs that they call working hard
They're in their cars, we're on the bus
It's them and us

Important folk have meetings all the time
Swill coffee, send orders down the line
They talk of us in numbers and they sneer at who we are
They bully us with jargon and they keep themselves apart
There's just one thing that we can trust
It's them and us

It could be worse, we have our fun just getting by
They're way above and we can see them flying high
We know what our place is, we know life ain't fair
We serve, clean and carry, they would rather we weren't there
We just turn up, do what we must
It's them and us
We just turn up, do what we must
It's them and us
We just turn up, do what we must
It's them and us
